At this juncture, the Express, always shallow in its judgment; always greedy for an assured advantage; always ready to sacrifice three points of principle for one point of gain, got down and crawled upon its belly before the coterie of bosses.

The attitude of the Times is well known and needs no reviewing here. It preferred to make an open fight against the uncanny combination, puting its fortunes to the issue, and if the fates so willed it, to go down in the struggle, rather than tamely submit to the ignominy of bossism. Was it a good fight? The result has already been attested. By the early

an abundance of the cane, the sweetest and purest that can be had, and there will be no trouble about raising good birds and good feathers. The stalk and seed contain all the elements of a vigorous nourishment.

This brings us to the subject we would like to see handled by an abler man than the writer, that of the manufacture of sugar on this coast from cane of some kind. There is no doubt the business is a good one. Take the same plant, or an equally expensive one, as elevating her sex to the dignity she en-joys wherever humanity is molded by christian culture. There is no no one would differ when the spe doubt as to the perfection of the cane, in the San Fernando valley, to give the He said: Education was not a crea outout as the Perceand valley, to give the highest percentage of saccharine matter. Sugar is as staple an article as flour. The seed from the cane will give more feed for stock, to say nothing of the value of the leaves and waste from field and mill as fodder. These suggestions are not based upon a merely superficial view of the case, as the writer has had some experience with cane on this coast and elsewhere.

When it is taken into consideration the transportation of angar from the cast and the islands, is it not clear that this forms a basis for operations in cane, growing and sugar making here, not to be ignored? People may talk as they please, especially those interested in discouraging the business from motives that are plain; the time will come when we shall produce our come sugar and sovert organ of a certain clique of the that are plain; the time will come when seems worthless when parched by the summer's sun in this arid land; but,

And all the various diseases of the HEAD THROAT AND CHEST EVE, EAR AND HEART Specially treated by

HILTON WILLIAMS.

At times many of the symptoms of catarrh may seem to abate, and the patient is ied to hope that the dis-see is about to wear off; but another class of symptoms soon appears, and he learns to his horor that, isstead of recovering from the disease, it is somewhat changed in character, and has extended to the throat. A sense of weariness is somewhat changed in character, and has extended to the throat. A sense of weariness is somewhat changed in character, and the individual of dryness a felt in the throat, or it appears that some foreign substance, as for instance a hair, obstructed the throat; there becomes a sense of languor and fatigue, breath lessens upon a little exertion, a short, hacking cough, a peculiar sound in clearing the throat, a feeling as though there were not room enough in the chest to breathe—these and other symptoms occur a 'ter the disease has made considerable progress. Then it is a time when consumption is about to begin its dreadful work. Up to tall time the progress of the disease may have been slow, and the patient may, in expressing his confident hope that it will "wear off," declare that he has had the catarrh for years and has not seemed to become much worse, and trusts that he will by and by recover; but this deluxion is the grand cror that has peopled our cometeries with consumptive forms.

We are positive in saying that three-fourths of the vast number who die of consumption might be saved, did they awaren to the true sense of da-gor when the disease, have expressed similar opinions.

The people do not require to be told the symptoms of consumption, for there is scarcely a family in our northern climate whose circle has not bean Invaded by the destroyer—acarcely a home waterin some passed is away from earth or is wasting to-day and seeming the hopeless victum of this terrible disease.

The symptoms of consumption, for them exist a thorough the result of the first hand throat, and three prominent, and wherever any of them exist a thorough the remaining the night, slightly and by the

storation.
Our fastern friends should not depend upon elimatic influences alone, for herein lies the fatal mis-a-e. Nearly every case requires positive medication, so as to become rid of the offending matter, the consolid sted portions of the lungs—thereby giving nature an opportunity to heal them.
